

Our Easy and Simple Process

DREAM

Explore photos on our website or gather your own inspiration. Either way, discover ideas that will help bring your dream kitchen or bath to life.

PLAN

(SHOWROOM VISIT #1)

Meet with our design team to share your vision, goals, and preferences. We'll discuss your space, style ideas, and budget to understand your needs and set the foundation for your project.

CONTACT US

Call us or visit our showroom to schedule a consultation for in-home measurements. If you already have measurements, we can begin planning your project right away.

DESIGN

& SELECTIONS

(SHOWROOM VISIT #2)

Once we have your measurements and understand your preferences, we create a 3D rendering of your kitchen, bathroom, or project. You'll then visit our showroom to review the design, provide feedback, and request any adjustments or modifications. This step ensures your vision is fully captured before moving forward.

MEASUREMENTS (IN HOME)

While some clients may take their own measurements, others prefer an in-home consultation with our design team. During the visit, we will:

- Accurately measure your kitchen, bathroom or designated space
- Take photos for reference
- Discuss your project goals and requirements

A fee applies for in-home measurements, which will be credited back toward your project once a purchase is made. This ensures precise planning and a smooth design and installation process.

REVIEW & APPROVAL

(SHOWROOM VISIT #3)

After your design and selections are finalized, we review your estimate, materials, timeline, and payment plan. Once approved, we schedule your installation, so you're fully prepared before work begins.

LOVE

Once your project is installed, we ensure everything is perfect. Then, there's nothing left to do but enjoy your new kitchen or bathroom!
